A WORLD LIST OF EXPERTS CONCERNED WITH THE STUDY OF TUNA

Prepared by

Fisheries Biology Branch, FAO

FISHERIES DIVISION, BIOLOGY BRANCH
FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS
Rome, February 1961

PURPOSE OF THIS SERIES

This is one of a series of technical papers in which are listed the names and addresses of persons known to FAO to be conducting research on, or interested in, a particular subject within the general field of aquatic sciences and fisheries research. Each list is extracted from the Register of Experts maintained in Fisheries Biology Branch. This Register consists of a set of edge-notched cards based on Information Forms which have been completed and returned by corresponding scientists. Indexes appended to the list are prepared according to the information entered on the cards, which may be sorted accordi to place of residence, language facility, subject fields of experience, species group studied and other attributes.

The first version of a list is prepared from names already in the Register of Experts to which are added the authors of documents entered in the Current Bibliography for Aquatic Sciences and Fisheries dealing with the particular subject, as indicated by the Taxonomic and Subject Indexes to that Bibliography.

This first, and each subsequent versions of a list is revised by sending a copy to each person named in it with a request for suggestions for the names of additional persons, to whom information forms are subsequently sent.

Entries in the list are numbered serially, and these numbers are used for reference in the indexes, which follow, where possible, the codes used in the Current Bibliography indexes. The names and addresses are set out in such a way that they can be cut out and used for index cards or mail labels. Extra copies of lists can be obtained by application to:

FAO Fisheries Division Biology Branch Documents

Two series of documents other than those prepared solely for FAO internal use are issued from the Biology Branch. These documents are not official FAO publications; they are given a restricted external distribution and this fact should be indicated if they are cited. Most of the documents in these series are prepared as working papers for meetings, or are summaries of information for the use of member governments, organizations, institutes and specialists concerned. The series are:

FAO Fisheries Biology Technical paper	FB/T(No.)
FAO Fisheries Biology Synopsis	FB/S(No.)

Special groups of documents within these series are identified by the following symbols:

RE	Indexed lists of names and addresses of experts drawn from the Register of Experts maintained by Biology Branch. (Technical Papers series) See inside front cover
CART	Synopses of information concerning the living aquatic resources of certain countries and regions
SAST	Synopses of data concerning certain species and fish stocks
MAST	Methods and subjects synopses
OT	Oceanographic synopses
IT	Limnological synopses

Numbers following these symbols are for classifying the document, using the codes of the "Current Bibliography for Aquatic Sciences and Fisheries" indexes.

Some documents may carry other identification numbers, if for example, they have been contributed to a meeting for which papers have been marked according to another system; in requesting copies of documents it is sufficient, however, to quote the "FB" number given at the top right-hand corner of the cover sheet.
